E-Commerce website management

Is your entire online payments e-Commerce website fully managed, operated and maintained by a third party? This means you have completely outsourced all operations in relation to your online payments e-commerce website.

No

Where is your e-Commerce website hosted?

Do you use a third party hosting company, e-Commerce platform provider, software as a service (SaaS) platform provider to host your e-Commerce website?

No **It says no, but Vanco Customer Support told us to put Solutio here.**

Your e-commerce website payment page

No, the payment page containing one or more form elements intended to capture the customer's payment card data is presented/hosted by my website

Your e-Commerce transaction processing

My customers payment card transactions are processed automatically. My e-Commerce website uses a payment gateway integration to communicate with the payment processor / payment service provider. (This integration could be shopping cart, payment software application, API or other payment gateway).

Your e-Commerce transaction processing set-up

Receives the payment card data entered by my customers

Who developed your e-Commerce store?

Developed and built within my organization

Your website shopping cart

.Netcart **We didn't know what to put here. This is the default setting**

Your payment gateway/processor

1 & 1 Internet AG **We didn't know what to put here. This is the default setting**

Is your payment gateway/processor PCI DSS compliant?

Can you verify or provide proof that your payment gateway/processor is PCI DSS Compliant for the services they provide to you?

No **Vanco customer support said we needed to ask you if you are PCI-DSS compliant.**
